RESUME

With master degree from Denmark, I have good understanding of food Science, Technology, and Society. I have learned and developed skills to solve Food and Nutritional challenges and link to health, experience, sustainability, and green transition. Lately i have focused to work with big datasets and analytics to get useful insights from data such as; understanding consumer behavior from consumer purchase data or exploring open-source research data. My skills can be useful for getting insight from data, developing innovative products and services, coordinating digitalization projects as well as research on future perspective on food, health and society. I am also open to relevant new challenges in Bio/life science.

Professional Competencies:

- ☒ **Management of food Product, Service and Technology**
- ☒ **Data Management: Gathering, Manipulation, & Visualization**
- ☒ **Research, Analytics & Insight from data**

WORK EXPERIENCE

- Innovative Business Model and Business plan
- Sales and Marketing strategies

Project title: Market development for protein rich ice-cream in Japanese market

COURSES, PARTICIPATION & CERTIFICATION

E-Learning: Big Data Analytics and Data Science with SQL and Python

2020 - 2022

- **Data gathering:** Web-Scarping, API connection, Database-integration ★ ★ ★ ★ ☆
- **Data manipulation:** RegEx, Cleaning, Feature selection, Visualization ★ ★ ★ ★ ☆
- **Data analytics:** Statistics modelling, Machine learning, Tableau ★ ★ ★ ★ ☆
- **Database:** MySQL, MangoDB ★ ★ ★ ☆ ☆
- **App-Development:** Flask and Django ★ ★ ★ ☆ ☆

I have been working with Consumer Food Purchase data, Food Climate, data and publicly open-source big datasets within food-nutrition-health.

Sustainable Business Models, Events by Oikos academy & Danish Business Authority

Feb-Apr 2015

- Sustainability thinking to design and implement Business Models

LANGUAGES

- **Danish** 
- **English** 
- **Nepalese/Hindi (mother tongue)** 

PRO-BONO ACTIVITIES

- I contribute as freelance to community based organizations that collect and distribute surplus to reduce Food-Waste such as; **FødevareBanken, WEFOOD, Københavns, Fødevarefællesskab (KBHFF) and MADBOKS.**
- It helps me to learned relevance of logistic, food supply chain and challenges of retail food waste.

PERSONAL PROFILE

I spend my free time on reading books, watching documentaries and exploring new technological changes. I follow new changes in food area for example; use of AI for vertical farming or consumer recommendation app. I mainly watch documentaries about food, society and technology including Netflix series! I love to cook food and combine different ingredient to create new taste. Also, I play badminton in the weekends to keep in shape and stay healthy.

My key personal competencies:

- ☒ **Creative-Thinking** 
- ☒ **Structured** 
- ☒ **Detail-Oriented** 
- ☒ **Analytical**
